# CalcIt!

Author: Arnar Dauletkul 10A

# Calculate it ???

This simple game introduces us to an **asteroid—Eunomia**—where we are initially living as an astronaut.

However, some **comet** is on the way to hit our asteroid which would cause massive destruction.

That is why there is a simple arithmetic calculations to be solved to stop the comet.

15 + 94 ➡️ 🤔 ➡️ 🧠 ➡️ ✏️

# Alright, how to PLAY???

Although it is a bit limiting and not cool, you would have access to a **terminal**.
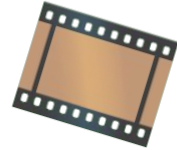

You type in your answer via **keyboard** before the **countdown**
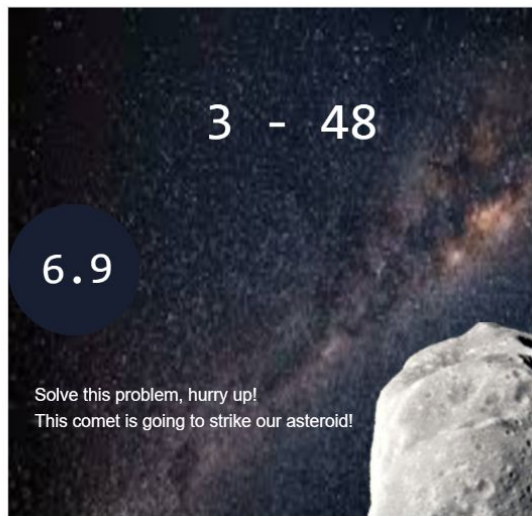

# Was that hard, actually?

Well, most of the **components** tend to be easy.

Though, the handling the time update per **100ms** for the **countdown** turned out to require **logical code** and some **time**.
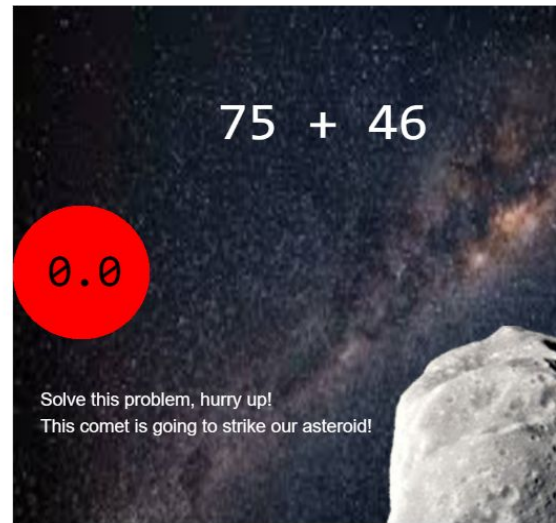

Screenshots of **3 states** of the game.
Pretty simple :)

That is it. **Thank you**!
